ABOUT ME

Computer Science and Engineering MSc student at Politecnico di Milano, currently focused on Embedded Systems development. My interests include rockets, computer security and artificial intelligence. I'm looking for a position where I can apply my knowledge at best in a challenging environment.

EXPERIENCE

Milano, Italy
October 2017 - Present

Software Engineer

Skyward Experimental Rocketry

- Student association that builds sounding rockets (current record 1.1km)
- Contributed designing and maintaining the software framework in use (C/C++, Miosix RTOS)
- Developed the RF communication software module (Mavlink, STM32) and the Ignition Board firmware (SPI, CanBUS)
- Software team management and work organization, Ground Station operations supervisor during the first Hermes flight (May 2019)

Milano, Italy
February 2018 - August 2018

Embedded Software Intern

OHB Italia

- Part of the team working on the Microwave Imager instrument for ESA/EUMETSAT MetOp satellite
- On-board software testing and validation (Cantata++, IBM Doors, IBM Rhapsody)
- Firmware development for the RFI mitigation module

Bologna, Italy
February 2013 - February 2015

Startup Co-Founder

Woofun S.R.L

- Facebook application for iOS and Android with 5000+ downloads
- Presented the app at the ERStartup event in April 2013

EDUCATION

Milano, Italy
2020

MSc in Computer Science and Engineering

Politecnico di Milano

- IoT project: smart interphone using Contiki, NodeRed and MQTT

Paris, France
2019

Exchange Program

EISTI Cergy

- Research project: developed a network Intrusion Detection System using neural networks

Milano, Italy
2018

Bachelor in Engineering of Computing Systems

Politecnico di Milano

- Algorithm Design project: file system implementation with file search optimization
- Software Engineering project: Java video game with client-server architecture

Palm Beach, Australia
2012

High School Exchange Program

Palm Beach Currumbin, Australia

SKILLS

- Embedded Systems (STM32, ARM)
- Communication and public speaking
- Machine Learning and Neural Networks basics (Keras, Tensorflow)
- Teamwork
- Programming Languages: C/C++, Java, Python, Scala

LANGUAGES

English

Advanced

French

Intermediate

PERSONAL INTERESTS

Since high school I am part of the collective *Beyond Common Ideas*, a group of six people focused on designing, producing and developing interactive projections and videomapping installations. Our projects can be found at beyondcommonideas.org.

I am a member of *ATILLA*, the free software group at EISTI.

I have a strong interest for Computer Security, and occasionally play hacking competitions (CTFs).
